

# AquaRocks

## Moisture And Nutrient Regulator

AquaRocks are an amazing super-absorbent polymer that absorb up to *400 times* its weight in water. When mixed into the soil, AquaRocks act like a water sponge, absorbing and retaining water and nutrients for use by your plants when they need it.

As your plants consume water, AquaRocks will gradually release the stored water back into the soil, and be ready to store more with the next watering. AquaRocks can repeat this process over and over again!

*Great for use in potted plants or in the yard.*

## Don't Loose Plants To Dry Soil Conditions

- *Save Time And Money*
- *Promote Healthier Plants*
- *Prevent Spills And Run Off*
- *Improve Root Growth*
- *Reduce The Effects Of Draught*

AquaRocks are an environmentally safe, biodegradable product made with only the highest quality materials. AquaRocks use potassium-based polymers, which are safer for plants than sodium-based products.

**A Better Way To Water**

# AquaSpikes

## Watering Made Easy

AquaSpikes Time Release Watering System is an easy-to-use slow drip irrigation system for worry-free watering of both indoor and outdoor plants. AquaSpikes deliver water to the roots - where plants need it most! AquaSpikes are great for every day use, or even when you're on vacation.

Have you ever spent months cultivating precious plants just to go on vacation, and come back to dying or dead plants? The answer is AquaSpikes. When used with AquaRocks, one application can keep your soil moist for weeks!

## AquaSpikes Are Ideal For

- *Vacation Watering*
- *Worry-Free Watering*
- *Indoor AND Outdoor Plants*
- *Water Conservation*
- *Reduce The Effects Of Draught*

# MegaGro

## Growth Stimulant

*Not A Fertilizer.  
Not A Plant Food.*

## Grow Like The Pros

**MegaGro is 100% safe for Plants,  
People, Pets and the Planet**

## **Achieve Great Results**

MegaGro is a revolutionary plant growth stimulator designed to dramatically increase plant growth for larger, greener, healthier, more beautiful plants of all varieties. Mega Gro contains the secret commercial growers have been using for decades to deliver great looking greenhouse plants.

## **Use MegaGro For**

- *Bigger, Greener, Healthier Plants*
- *Greener, More Beautiful Lawn*
- *Larger Trees, Bushes And Shrubs*
- *Larger, More Plentiful Blossoms*
- *Increased Crop Yield For Produce*
- *Improved Seed Germination*

Plant foods and fertilizers supply the building blocks a plant needs to be healthy and strong. But adding too much plant food can actually damage plants. MegaGro provides a safe, effective way to grow bigger plants without over-feeding. MegaGro is not a fertilizer or plant food and works best when used in addition to normal feeding.

**Easy To Use - Simply Spray On**

**Fast Results - In Just A Few Weeks**

**Universal - Works On All Plants**

## **Great For Outdoor Use**

From *patchy lawns* to *scrawny shrubs*, MegaGro will make your yard the talk of the neighborhood.

*MegaGro Ready-To-Use Spray* is great for both indoor and outdoor use. In the *yard*, MegaGro will help increase the size and leaf area of all your landscaping. On your *lawn*, MegaGro will fight brown patches and is great for growing grass seed.

*MegaGro Concentrate* is perfect for treating large areas. Whether *seeding a lawn* or *planting shrubs*,

MegaGro gets them off to a good start. One Concentrate will make 10 gallons of spray. It can be easily added to a pump or hose-end sprayer for large projects.

## **Spray MegaGro On**

- *Bushes & Shrub*
- *Ground Cover*
- *Young Trees*
- *Patchy Grass Areas*
- *Grass Seed*
- *Saplings*
- *Fruits And Vegetables*

**For Garden And Yard**

## **Perfect For Indoor Gardening**

All plants are naturally “outdoor” plants which can often make them difficult to grow indoors. MegaGro can give your plants the extra help they need to look great all year long. MegaGro is also ideal for growing from seed. You’ll see greatly improved results when you soak your seeds with MegaGro Concentrate.

Have you ever had a Ficus tree turn yellow, and drop all its leaves during the winter and look terrible? That is what can happen when plants become dormant. Most indoor plants are tropicals and are native to areas of year-round growth. MegaGro helps keep your tropicals and other plants green and growing by preventing dormancy. Just spray MegaGro once a week to have beautiful looking plants all year long.

MegaGro provides just the right boost to get your indoor plants to bloom, even under less than perfect conditions.

## **Use MegaGro Indoors To**

- *Boost Growth Of Potted Plants*
- *Prevent Dormancy*
- *Increase Indoor Blooming*
- *Improve Seed Starting*

**Keep Indoor Plants Healthy And Growing All Year With MegaGro**
